Fathers and Sons Make Merry

On the evening of April 15th, about sixty dads and lads gathered together in the new Community Hall, where they heartily enjoyed a Father and Son banquet.

After everyone's appetite had been satisfied, several toasts were proposed and responded to. First, toastmaster Phil Bastin, proposed a toast to the King. Following this were toasts proposed to the dads, mothers, and to Canada by Bert Hoskins, Ernest Harper and Don Campbell. Mrs. Hunt responded for the mothers and Mr. Campbell for the dads.

Bob McCullough gave a short talk on "His Opinion of the Trail Ranger Program," giving the pro and con of the matter.

Mr. R. I. Baker gave a very clear idea of what the Tuxis program stood for and how it was carried out. He explained that the Tuxis program was to make the boys of today better citizens of tomorrow.

Then Alex Latiff gave a very concise report as to the financial standing, membership and general progress of the Trail Ranger Group.

Max Caldwell then proposed a toast to the Girls' Clubs. Following this Misses Moyle, Bond and Smithson, who were representing the C. G. I. T. groups, gave interesting reports of the work done by their groups since they organized.

Rev. Lee of Barons and Rev. Hunt then gave short addresses.

After a sing song, several musical numbers were given. Those taking part were R. Latiff, piano solo; Rev. Hunt, vocal solo; and Max Caldwell, piano solo.

Ralph Erdman, member of the Alberta Boys' Parliament, from Barons gave a very interesting talk on the work carried on by Parliament during the last session.

After several games had been played, in which the dads and lads challenged one another, the evening was brought to a close by singing God Save the King.

We, the members of the Champion Trail Ranger Group, wish to thank the mothers, the directors of the Community Hall, and all others concerned, for their kind support without which, the Father and Son banquet would not have been the success that it was.

Arbor Day Monday, May 6

Monday, May 6th, has been named as Arbor Day by decision of the Provincial Government. On this day special attention will be paid throughout the province to the planting of trees and flowers and the beautification of homes and grounds.

Mrs. W. C. Hoskins Heads Ladies' Aid

The Ladies' Aid met at the home of Mrs. W. Ryan on Thursday. A large number of ladies attended and considerable business was accomplished. A Birthday Tea was suggested to take place in May. The sum of \$23.65 was made at the Guest Tea held March 9th. Mrs. W. C. Hoskins was asked to finish the term as president for the year. The next meeting is to be held at the home of Mrs. Friesen. Mrs. W. A. Summers and Mrs. F. Caldwell will assist the hostess in serving refreshments.

Everyone is invited to the "Father and Son Service" on Sunday evening. Whether the boys are young or old, belong to the Trail Rangers or not, all are invited to come and sit with their fathers.

Friday & Saturday
April 26-27

Cleaverville Pioneers Crowd New Hall

The annual gathering of the Cleaverville Pioneer Club was held in the new community hall on Friday evening, April 12th. There was a record attendance, all thoroughly appreciating the excellent accommodation offered by the new hall.

The vice president, A. J. Miller, was in charge and the proceedings were opened by singing "God Save the King." Mrs. F. C. Alcock at the piano. A short musical program followed and the secretary presented a short report and financial statement, which was adopted by the meeting. The election of officers was then proceeded with the following result:

President, A. J. Miller.
Vice President, H. J. Higgins.
Directors for Three Years, J. D. Hagerman, G. Rhodes, G. L. Depe.

Dancing was then in order, excellent music being furnished by Mrs. Clements, F. Clever, P. Bowie, M. F. Hamilton and B. Hummel.

A very excellent supper was served in the basement, with Mrs. L. Poth in charge as convener with a large number of willing helpers.

The gathering dispersed about 4 a.m., everyone voting the gathering as one of the best ever held.

W.I. Executive Will Entertain

The Executive Board of the Champion Women's Institute will be hostesses at a social afternoon to be held at the home of Mrs. Guy Dow on Wednesday, May 1st. Cards, both bridge and whist, will furnish entertainment from three o'clock to five. Refreshments will be served immediately following the games. A charge of fifty cents will be made for cards and tea or twenty-five cents for tea alone. All ladies of the community are invited. Reserve table if you wish to bring your own party.

Card of Thanks

Mr. and Mrs. C. R. Adams and family wish to thank Mr. and Mrs. Hanna of Lomond and their many friends in Calgary, Champion and Lethbridge for their many kindnesses shown to them in their recent bereavement.

Coming soon, to the Champion Theatre, "Underworld."

NOTES AND COMMENT.

The Carmangay Agricultural Society is again offering prizes for community exhibits, Champion, Carmangay, and other places being named as contenders and the prizes \$50, \$30, and \$20 Champion was the lone contender last year but the exhibit furnished evidently impressed the directors very favorably when the offer was made. Naturally the officers of the Society hope that individual exhibits will accompany the community exhibit and this will happen extensively this year without doubt. Those capable of furnishing material for such an exhibit as Champion made last year could also provide individual exhibits of like merit and those in charge of the community exhibit this year should endeavor in every instance to urge individual exhibits from those who furnish the community exhibit. In this way everyone would benefit in proportion to the handsome prizes offered. It will be noticed that even the losing entry in the community contest will receive a prize of \$25, a very satisfactory arrangement to the exhibitors, as there is a lot of work involved and the benefit will in every instance likely go to the organization which takes the matter in hand. Without any official information to that effect it may be considered certain that the Women's Institute will again handle Champion's part of the contest this year, as no more favorable results could be attained by any other body. The matter should be taken hold of at once and an effort made to assure the very best exhibit possible from this section.

The association of British Chambers of Commerce are of the opinion that a campaign of advertising of products throughout the Empire and particularly in Canada would prove a tonic which would remedy any ills British trade is now suffering from. Five million dollars a year for ten years was the sum prescribed to be spent.

The farm loan board for the province has been appointed in the persons of J. C. Murray of Edmonton, A. H. Tovell of Calgary and Geo. Bennett of Mannville. Steps will now be taken toward getting the act into operation in Alberta and a number of applications and inquiries respecting loans, already in hand, will be dealt with as soon as possible. Formal acceptance of the nominations from Ottawa is awaited, however, before any further action is taken locally.

NEWS NOTES

In connection with the distribution of trees to prairie farmers in Canada which is made annually by the Tree Planting Division of the Forest Service, Department of the Interior, it is interesting to note that each spring nearly 8,000,000 young trees are sent out; shipment of these trees require 2 1/2 car-

loads of moss and nearly 10 miles of 15 inch burlap. Before many years are gone, the "tree less prairie" will be a thing of the past.

Fish to the value of \$870,428 were caught in Alberta lakes and rivers in the fiscal year ending March 31, 1929, according to statistics issued by the Department of Marine and Fisheries, Ottawa. Of this amount \$729,334 represents the commercial catch. White fish headed the list with a total of 2,733,000 pounds valued at \$350,703; trout stands second with 1,957,100 pounds valued at \$222,317 and pickerel third with 854,500 pounds worth \$92,160. In addition to this value of miscellaneous fish caught under commercial licenses is placed at \$5,814. The total number of commercial licenses issued during the year was 1,144. Domestic licenses numbered 280 while 976 free permits were given to Indians and half breeds. Under these classes of permits 1,348,900 pounds of fish were caught to the value of \$67,449. None of this fish was sold, however, the licenses carrying no commercial privileges.

Sir Thomas Tait, president of the Canadian Salt Co., Windsor, Ontario, will shortly pay a visit of inspection to the salt deposits in northern Alberta according to information received by Hon. V. W. Smith, Minister of Railways and Telephones. In his position as head of the largest company of its kind in the Dominion, Sir Thomas is reported to be interested in possible developments in this promising Alberta industry.

Substantial prizes will be awarded in a competition sponsored by the Staveland Board of Trade and the Vulcan and Northern Agricultural Societies for the best ten acres of wheat in Southern Alberta during the coming season. The decision to organize the competition followed by a speaking tour by Major H. G. L. Strange and D. H. Gallenrath, M. L. A., under the auspices of the Canadian Seed Growers' Association and the committee in charge of the recent "Better Seed Campaign" promoted under the direction of the Provincial Department of Agriculture.

Two new bulletins have recently been issued by different branches of the Alberta Department of Agriculture and are now available for distribution. The first of these "Home Decoration" is published by the Alberta Women's Bureau and will be found to be of particular interest to those interested in home beautifying. The second, entitled "Turkey Breeding and Management" is issued by the

Poultry Branch and contains a great deal of valuable information dealing with this profitable farm product.

Municipal District of Harmony, No. 128

Section 17, Domestic Animals Act (Municipalities).

PUBLIC NOTICE is hereby given that there has been introduced in the Council of The Municipal District of Harmony, No. 128, a by-law of which the following is a short synopsis:

"No person shall permit any sheep to graze upon any unfenced land, other than land owned by the actual owner of such sheep."

"Horses, Asses, Mules, Cattle, Goats, Geese, Sheep and Swine are prohibited from running at large within the boundaries of the Municipal District for the whole year."

A copy of the said by-law may be seen in the following places:

The Municipal Office, Champion; The Post Office, Champion; The Post Office, Reid Hill; The Post Office, Carmangay.

And further that unless within thirty days from the publication of this notice at least forty resident electors of the municipality petition the council to submit such by-law to the vote of the resident electors of the municipality the council will proceed to pass the same.

Found—Firestone tire, size 140/21 and rim. Owner call at Chronicle office.

The United Church of Canada

(A Fellowship of Memory and Hope.) Sunday evening, April 21st, "Father and Son Service" to which all fathers of the community are invited with their boys members of the Trail Ranger group will take part in the service.

These are some compliments paid

MAYTAG WASHERS

In your selection of a Washer, quality and performance alone should govern you.

Price never has and never will offset future service and satisfaction. The difference in price is made up in faster and cleaner washing, more substantial materials, improved wringer and special Maytag features, controlled, and only found in Maytag Washers.

Don't buy a Maytag until you are satisfied it will do what we claim. Put it under every test. If it fails return it. Surely nothing could be fairer than this.

ENGINE OWNERS!

Shell Users are Shell Boosters

There is a grade of Shell Oil for every Engine.

Pull Your Discs with Three-Fuel Power

Built for tractor power, the one-way-disc pulled by a three-fuel Hart-Parr cuts to full width at any depth. You need not just skin your land, for Hart-Parr power enables you to set the plow down where it belongs and keep it there. Two and even three one-way-disc plows are common behind the larger Hart-Pars. They pay their way. Hart-Parr is the one tractor that develops tremendous power from gasoline, kerosene or distillate. We are now showing the improved 1929 line equipped with three forward speeds to speed up hauling and field work. Hart-Pars are built for small, medium or large farms. Come in and see them.

Society Brand Clothes

© Society Brand

Would you buy clothes "sight unseen"?

Of course not. And yet, in a sense, that's just what you do every time you purchase a suit of clothes!

For the most important part of a suit is the part you can't see—the framework of inner construction and tailoring.

It is this that determines whether the collar will fit snugly, and refuse to pull away from your neck. Whether the lapels will keep their graceful contour. Whether the area around the armholes will remain smooth. Whether the trousers will continue to hang in a clean line.

When you buy Society Brand, you can take these things for granted. Master craftsmen have labored to make each detail perfect. With handwork—with exclusive processes of tailoring—with tireless attention to fine points.

Result: Your Society Brand suit keeps its smartness as long as you wear it!

W. C. HOSKINS

CORRESPONDENCE

To the Editor of the Champion Chronicle.

Dear Sir—Reading down your comments in last week's paper you speak about the council planting trees around corporation buildings, and as you mention my name in your remarks in connection with the same I would like to draw your attention to the fact that there is not a tree any where near a corporation building as they only own the Fire Hall and there are no trees around that. Why did you not come out flat footed and not go around the bush and say "around the Mayor and councillors' residence?" Now, Mr. Editor, if you want my job as a chronic kicker in this community come out in the open and kick where it will count and I will be at your back to help you kick. I was told by our Mayor before you put in your comments that the council was willing to furnish trees to any taxpayer if they would sign agreement to look after the same in a proper manner. Hoping this will show you that I am still on the job and that you will publish this in your next week's paper.

I remain yours truly,
James Brown.

Mr. Brown seems to think the suggestion that the attention of the council in tree planting was confined too closely to certain streets was a bid for his job of chief "Chronic Kicker," as he puts it himself, and an evidence of cowardice on the part of the editor for not saying the council's attention was devoted to their own immediate residence section. He also takes the inference from what was written that The Chronicle desires trees in front of the Fire Hall. In speaking of corporate premises the streets at large were referred to. The council may not own them but are decidedly responsible for their condition. To make our position clear it might be fair to say that only the fact that the councillors live closely together permits of the suggestion they are favouring themselves when planting trees and had any offer of trees for those

who would plant and take care of them been made public it would have eliminated any criticism. The editor believes that any citizen who deserves trees should both plant and take care of them when placed in front of his property.

Read the Ads It will pay you.

Keep the Home Fires Burning

We can supply you with everything for the office

Not only in the ordinary printing lines can we meet your requirements but in everything pertaining to the office in books and sundries. Incidentally you will find we can save you money.

The Chronicle

Never again say—

Is that all you paid for this . . . ?
Where did you ever find these . . . ?
Why, it costs me nearly twice that much!
Do tell me where you get them for that!
How do you ever manage so well on so little?
But, aren't they awfully expensive?
I wish I could do it.

Read the advertisements. Know what you want before you go to buy. Get the most for your money by knowing what manufacturers and merchants are offering.

Advertisements will keep you abreast of the times. They will enable you to spend the family income wisely. They will help you to live better at less cost.

Then—when remarks similar to those above are made to you, pass on this good advice, for all who want the best at the least cost—read advertisements.

READ THE ADVERTISEMENTS

LOCAL AND GENERAL

Frazer Bros' orchestra will play for a Jitney dance this Saturday night, in the new hall, after the show.

C. M. Granlin and Nelse Running arrived in town this week to begin seeding operations on the Adams' farm just west of town.

Work on the land was fairly general on Monday morning, although the very windy weather experienced was far from encouraging. The land is unusually dry this year and when stirred in a gale of wind is inclined to move to other farms.

Mr. and Mrs. P. P. Peterson visited H. T. Smith and Vera at Hartley recently.

The cleaning up process is already under way in almost every quarter of the village and it is to be hoped will continue until all premises inside the corporate limits are beyond reproach. While refuse and other matter deleterious to health should receive prompt and careful attention it should not be forgotten that a big improvement in appearances may be achieved by the removal of old machinery and other unsightly articles which are prone to clutter up the landscape.

How About Oil?

For the Power Machinery you will be operating this year.

We have a proposition we feel sure will interest you in this matter. Before placing your order call and see us about it.

Think Of The Future

A condition of prosperity prevails throughout Canada from coast to coast. It is not confined to any one section nor to any one industry or group of industries. There is, in fact, a generality to the extent favorable situation probably without a parallel in the past history of the Dominion. This is not to say that everybody or every industry is equally prosperous or, indeed, that there are not those who do not enjoy prosperity. The country is true, but taking Canada as a whole, and in the major activities of its people, prosperity reigns today.

Such a condition is, of course, gratifying. Nobody would have it otherwise, and all desire that it shall be long continued. But there are dangers to be avoided in times of more or less universal prosperity which do not present themselves when times are hard and business depression rather than business activity is in evidence. It is an old and often proved statement that many people who can and have stood strong and true through the strain and stress of adversity, and were through to ultimate victory, have cracked and broken when favored with prosperity and success.

Canada is prosperous today, and it should take full advantage of its present favorable position. The people are optimistic and should continue so. They should continue to show vision, courage, and energy in constructive development. They would be unworthy of their heritage and the future possibilities of their Dominion if they acted otherwise. But they should nevertheless have a care in the enthusiasm of the glowing present not to forget the years to come.

Just as night follows day, winter follows summer, youth grows into old age, and death is the ultimate end of birth, so it is inevitable that, in course of time, depression in business will follow buoyancy. A prodigious savings just as far one way as it does the other. It is a wise man and a wise community, therefore, when times are good and development is the order of the day, takes thought of, and prepares for that future day when retrenchment may become a necessity.

If growth and expansion is artificially pushed too far; if an individual or a community become committed to large future obligations in order to further speed up present development, they may find themselves in great future difficulty.

All countries, all communities, most individuals, have passed through such bitter experiences. Western Canada has not been immune from them, and those who recall the "boom" days of the past know that the period of adjustment following the collapse of a "boom" was much longer than the "boom" itself, and that in the final analysis the losses far out-weighted the gains.

At the present time all our Western cities, towns, villages and rural municipalities are planning their programmes for 1929. Times are prosperous, the country is growing, and the almost universal demand is for increased expenditures to provide this and that. Today it is possible and comparatively easy to borrow the money to carry such enterprises through and to meet the initial interest charges. But a debt is created which will remain for years to come. When the present buoyancy subsides, when money is less easy to obtain, when depression and some degree of unemployment replaces present favorable conditions in business, will the load be too heavy to carry?

It will be useless care is exercised by all civic and municipal authorities in seeing that the safety line in expansion is not passed, and that expenditures now made are for permanent constructive work which will be rewarding in the years to come. Extravagance in ideas is no more justified in times of prosperity than they are at other times. It is in these "other times" that the bills really have to be paid.

Developmental works are necessary and are justified in times of prosperity, when they would be suicidal, in fact quite impossible, in times of depression. When depression prevails it is frequently impossible to provide for even imperative and wholly justifiable expenditures. These must be provided when times are prosperous. It then becomes an equally imperative duty to provide them.

But non-essentials, no matter how desirable they may be in other respects, should be carefully considered less citizens, the taxpayers are unthinkingly swept into the authorization of expenditures which later on they may have cause to bitterly regret.

Such words of warning are unnecessary in times of depression; it is now, when prosperity is with us, that warnings are necessary and should be heeded.

Farm Loans Soon Available

Ottawa Ready To Administer System To Canadian Farmers
 Alberta and British Columbia lead the provinces of Canada in the move to take advantage of the long term loan system, given to farmers through the Canadian Farm Loan Board. In these two provinces provision has been made for the provincial boards have been constituted by order-in-council. This was announced by Dr. J. D. MacLean, commissioner of the Central Bank, following the first meeting of that body since he returned from an organization tour of the west.

At the meeting, a statement given out by Dr. MacLean says, there was general discussion with respect to the progress of the work of the board, both at head office and where the branches are organizing. Machinery in Ottawa is complete for the administration of the long term loan system to Canadian farmers, and remains only for the provinces to form their boards and for the federal and provincial bodies to deal with the applications for funds made to them. He expects loans to be made to farmers in the near future.

Record Beet Acreage Predicted

All records for beet acreage in southern Alberta threaten to go by the boards in 1929. Pre-sign-up indications are that there will be over 10,000 acres of land planted to this crop if the spring outlook is at all satisfactory.

Prince Has Turned Author

Writes Foreword To Final Volume Of Merchant Navy

The Prince of Wales has turned author, or at least has written a foreword to the third and final volume of the Merchant Navy by Sir Archibald S. Hurd. The foreword was written in his capacity as Master of the Merchant Navy and fishing fleet, conferred upon him by the King last year.

Paying warm tribute to the British mercantile marine, the Prince refers to the thrill that he has always experienced in his world-wide travels at the sight of the red ensign lie refers to the work of the merchant marine in the world war as having provided the final test of a heroism unparalleled in history.

A SPRING TONIC

AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through the Use Of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the springtime, like most of a trying time for those who are not in rugged health. Many men, women and children are weak in the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach.

A tonic for the blood and nerves at this time will do much for the blood and nerves. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak. It is impossible to be energetic if the blood and nerves are weak.

Farmers Show Interest In Valuable New Book

"Field and Farmyard" Being Distributed Free To Farmers
 The new book "Field and Farmyard" which is being offered free to farmers by Imperial Oil Limited, has aroused a great deal of interest among farmers, and is creating for them a great deal of favorable comment.

The book deals with practical farming problems covering different phases of cropping and cultivating, as well as livestock breeding, and has been judged by all classes of farmers in all sections of the country as a most authoritative work.

The book is being offered free to farmers by Imperial Oil Limited, has aroused a great deal of interest among farmers, and is creating for them a great deal of favorable comment.

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

THE DRIVE TO FINISH OLD MAN DIRT IS ON

Greatest Effort in History of Canadian Cleanliness
Includes Hundreds of Communities

The greatest effort in the history of Canadian cleanliness is on! Cleanliness has a history. It's influence can be traced down the ages. Those races that were clean were the races that were Masters.

The Athenians, with their baths and beautiful homes conquered the Persians, with their unkempt heads and dirty skins. The Romans, with their aqueducts, their barbers, their gardens beat the barbarians with their goat skins and greasy ingers.

Louis the Fourteenth was the dirtiest monarch France ever had and one of her miseries. His kept the Panama Canal from being built years before it really was. Bolshevism flourished when the dirty and the ignorant gained control in Russia—sanarchy breeds in filth and squall.

Cleanliness has always been po-

tent. Modern sanitation saved millions of lives in the great war.

Real people, the wise, the leaders in progress, always have fought for cleanliness. At times it has been a sporadic fight, a skirmish. A clean man was handicapped by a neighbor who let his premises run wild. The co-operation has been brought to play at last.

This year, in Canada alone, hundreds of villages, towns and cities are campaigning for cleanliness, health, and beauty. They are not doing so for a day or a week but in a continuous campaign. There is a steady pressure.

The cars, fish, refuse, dirt, waste paper, unsightly buildings, unpainted surfaces are taboo. The drive is on. I won't be stopped.

Join the forward movement. Clean Up, Paint Up, and Keep It Up. Make the old enemies, Dirt and Disease and Unpleasantness abdicate forever.

The Use of Paint

Lessens Farmer's Cost of Doing Business

The farmer, like the manufacturer, must employ the most efficient and economical methods of doing business if he is to prosper. When he keeps track of his expenses, he finds that by building of better material, buying better implements, and then taking care of them, he increases his power of production and lessens the drain on his income.

Next to the purchase of good materials, the use of good paint is the farmer's best insurance. It protects his property and equipment against the rapid deterioration caused by wear and weather. The protection and appearance of barns, fences, windmills, wagons, tanks, etc., are just as important as the careful upkeep of factory tools and machinery, and depreciation here should be figured as carefully by the farmer as by the manufacturer.

A few cents invested in paint and a little work each season will soon show in the lengthened life of your equipment to say nothing of the satisfaction you will take in its improved appearance. Here is a list of paints that it will pay you to keep on hand:

Two-quot can of buggy paint in red and black, for painting up wagons and buggies.

A small can of aluminum paint, for interior iron work, such as stalls, stanchions, etc.

A small can of implement or spar varnish.

A half-gallon can of metal protective paint, for metal buildings. A good graphite paint is best for this purpose. Paint over regularly all such exposed metal parts as hoops, turnbuckles, outside hinges, door-hangers, from hitching posts, etc.

A gallon can of oil or house color for general repair work.

It is well also to periodically treat the inside of staved stalls with the special compounds prepared for that purpose.

The life of fence posts can be prolonged three times if the lower part is treated with the compound used on silo staves. This can be most easily done by taking a full barrel of the preservative, pouring half in another empty barrel, letting the heads out of both barrels, and taking the fence posts stand in them over night. This treatment will make the poorest wood last longer than the best chestnut.

It has been proved that the painting of good galvanized wire fence doubles its life. In putting up a new

woven wire fence the painting can be done very easily by making a shallow trough that will take in the dirt of wire fencing. Turning the roll around in the trough and pouring the paint over it at the same time will also do for wire fencing. Turning the roll around in the trough and pouring the paint over it at the same time will also do for wire fencing.

A paint which makes concrete surface non-absorbent to shed an ordinary rain greatly enhances the value of concrete buildings for stable coops, granaries, dairies, etc. This absorption of water through the walls has been the principal objection to such buildings in the past. Concrete paints come both in natural cement color and in several pleasing shades.

It is never advisable to use a paint on old shingle roof unless it is a waterproofing paint, because the water gets under the shingles causing them to rot and curl up. It is always well, however, in putting on a new shingle roof to dip the bunnies into a properly prepared shining stain; this is especially true now—a day the quality of shingles is much poorer than formerly.

It is good policy not only to prevent deterioration with paint but also to forestall paint troubles. The commonest of all paint troubles is peeling, the chief cause of which is moisture, and moisture in turn is due to:

1. Dampness in the Wood. This means not only wood which is damp to sight and touch, but wood improperly seasoned, recently exposed to rain or fog or dew.

The pores in kiln-dried lumber are open and will soak up moisture, for this reason allow a new building to stand a month or two unpainted.

In short, if there is moisture in wood, heat will drive it out and on in. If heat on the inside of the house drives it outward the paint will peel. This is commonly due to green plaster. Too often in a hurry to complete a house the painters are put to work on the outside while the plasterers are finishing the inside. To complete the rush, about the time the paint is dry the plaster is started to dry the plaster. The moisture must find an outlet and is driven out through the exterior woodwork, carrying the coat of paint with it.

2. Ochré Priming Coats. Common ochre is the cheapest pigment, and when one remembers that the Priming coat is the foundation on which the finishing coat depends, he does not have to be a paint manufacturer or dealer to appreciate how absurd is the statement so often made "Anything is good enough to prime with." Cheap ochre is nothing but clay stained, which makes a slippery little paint.

3. Old Paint Loosely Attached to the Wood and Not Thoroughly Cleaned Away. If old paint is not firmly attached to the wood the construction in the drying of the new paint will peel it off. Repeat before the old paint begins to let go, its poor economy to delay repainting.

In case the under coat is brittle, scrape, sand-paper, and wire-brush all loose particles before repainting. If too far gone remove with a paint-scraper. Always remember three thin coats of paint are better than one thick coat. The thick coats may

save a few dollars in the beginning but may cost more than double in the end.

3. Fat Resinous Wood Not Properly Seasoned or Prepared For Polishing. This is a recent trouble. The chief trouble is with yellow pine, which is full of turpentine and resin. It is the resin that causes the trouble. It mixes with the paint and makes it brittle.

The knots and resin spots and should be coated with shellac before painting. Turpentine dissolves resin. This fact suggests much turpentine and little oil in the primer coat, and perhaps more turpentine than usual in the second coat, but, when every care is taken, paint will sometimes peel on yellow pine, where it is so fault of the painter or the paint. Liberal use of turpentine and vigorous use of the brush to work the paint into the pores are necessary to success on yellow pine.

4. Boiled Oil. Never use boiled oil in the primer coat. When it is used it remains boiled linseed oil; its preparation gives a glossy, varnish-like surface, and the priming coat should always be flat, or the subsequent coats will not adhere to it. Boiled oil should never be used for any coat in outside painting.

Point may fall from causes other than those named because of application on dirty or greasy surfaces; because of leaky roofs; because of the use of adulterated linseed oil and poor driers; because the coats are too thick; or because the under-coats are not dry—but the majority of cases are covered by the causes specifically named in this article.

Rules For Fire Prevention

Do not permit rubbish, greasy rags, paper, etc., to accumulate in or around buildings.

Do not allow matches kept in your homes, offices and stores in other than metal boxes. Use safety matches.

Do not allow children under ten years of age to use matches.

Do not use lamps and lamp burners that are not clean.

Do not tamper with or extend electric wire, employ an electrician.

Do not keep gasoline in other than airtight cans painted red.

Do not fill tank of gasoline stove when lighted and fill by daylight only.

Do not permit a rubber tube connected to a gas stove.

Do not empty tubs in other than metal cans.

Do not carelessly throw cigar and cigarette stubs where they could cause a fire.

Do not fail to warn your children of the dangerous fires.

Long through preventable fires in the United States is \$250,000,000 which, however, is exceeded by the annual loss through the loss of painting—according to Prof. H. H. King, who has conducted painting tests for several years for the people of Kansas at the Kansas Agricultural College.

Clean-Up and Paint-Up campaigns reduce the cost of insurance rates; increases property values; remove unsafe buildings; event the fyke make school and homes; make cleaner, safer, and more attractive; educate children in fire prevention and clean-up measures; plant trees; collect and utilize waste; make more attractive and safer homes and places of business; and develop a community spirit that permanently makes a cleaner, safer, healthier and more beautiful town.

These All Count

Here are some pointers for citizens who would regenerate their community with a Clean Up and Paint Up campaign:

1. Take away all the ashes and trash from your back yard immediately. Send your rubbish to the dumping ground.

2. Suggest to several men with teams that they drive through the alleys with a sign, "Clean-Up Wagon" on their wagons; also a bell calling attention. People are only too glad to pay such a man for hauling their trash away.

3. Burn all rubbish that will burn. Clean your vacant lots and alley ways.

4. Make your street and parking look as trim and well kept as possible.

5. Refrain from throwing old paper, banana and orange skins into the streets.

6. Plant some grass and flower seeds to make your home beautiful.

7. If your street front is dirty, paint. Painting will more to improve the appearance of a town than the liberal use of paint.

8. If there are unnecessary, unsightly sheds in your back yard, tear them down. They detract from the beauty of your home and the town. Open spaces and fresh air are better.

9. If your wall is an eyesore to those travelling over it, repair it or build a new one.

10. Trim hedges and trees and spray trees.

11. Paint and whitewash barns, poultry houses, outbuildings, etc.

12. Paint tools and machinery.

The local "Clean Up and Paint Up" campaign offers the most direct and practical and permanent avenue through which women, organized or individual, can work for homes and home towns beautiful and sanitary.

For Health's Sake

Clean Up and Paint-Up—Guard Against Epidemics By Removing Their Cause

Tuberculosis and other germ diseases are generally brought about by dirt and filth. The germs of tuberculosis cannot live where there is sunlight, cleanliness, and fresh air.

The scrubbing brush, soap and water, paint and whitewash are deadly enemies of tuberculosis. The easiest way to get rid of the germs that have nested in your house and around your premises is: Clean-Up and Paint-Up.

The cleaning out of filth will keep down tetanus, diphtheria, typhoid, and diphtheria, as well as tuberculosis. And the painting brush should follow the scrubbing brush so that the cleaned places may be kept clean.

Do you want a clean town? Then do your part. Go through your home from cellar to roof and gather up all the old, useless, worn-out things stored away and get rid of them.

Now, Clean up the rubbish, sales in the cellars, yards, alleys, and alleyways.

Screen your houses thoroughly. Remove any animal or vegetable matter. Manure breeds flies, which carry disease to human beings, especially the babies. Clean out and fix up the manure bins. Repair your yard fences, poultry houses, out-houses, etc. Then paint or whitewash them. Don't spare the paint.

BUDGET PASSED BY MAJORITY OF 24 VOTES

Ottawa.—The budget passed the House of Commons by a majority of 24 votes.

The final division, which resulted in the casting of 107 votes for the budget and 83 against, followed closely along party lines. All the Liberals, Liberal-Progressives, the two Independents, A. W. Neil, of Ontario-Alberta, and Henri Bourassa, of Quebec, were in the majority; H. B. Adams, Labor member for East Calgary, and L. H. Jeffries, U.P.A. member for Lethbridge, supported the government's motion.

In opposition were all the Conservatives, all members of the U.P.A. group with the exception of Mr. Jeffries, all the Progressive members and J. S. Woodworth, Labor member for Winnipeg. Mr. Jeffries, Labor member for Winnipeg North, was not in his seat when the final division took place.

The vote on the main budget motion climaxed the most colorful day which the House of Commons has known in this session, with the divisions resulting in the defeat of the sub-amendment and amendment to the main motion, which had come from the U.P.A. and Conservative ranks, respectively.

The U.P.A. sub-amendment, which in brief, asked the government to consider the British preference, was defeated by the substantial majority of 138. Its support came only from members of the U.P.A. and Progressive groups and the two Labor members, Messrs. Woodworth and Heaps. Against it were lined up Liberals, Liberal-Progressives, Conservatives, the two Independents, Messrs. Neil and Bourassa, and H. B. Adams, Labor member for East Calgary.

The majority against the Conservative amendments was 62.

The amendment received wide support from the Conservative party. All other members in the House were opposed. The Conservative amendment, which was suggested by Hon. Hugh Guthrie, expressed regret that the budget made no provision for "reimbursement" for agricultural and industrial purposes or in industrial employment in Canada.

Should Share Research Funds

Fertion Should Go Toward Education Says Toronto School Board Member

Vancouver.—A portion of the funds available for research under the direction of the Dominion Government Research Commission should be set aside for investigation of educational methods, was the suggestion made by Mrs. H. Plummer, member of the Toronto school board, speaking at a luncheon tendered by the Vancouver school board. Mrs. Plummer said she was delegates to the National Council of Education.

The development of natural resources and the protection of them, but Mrs. Plummer said the training of the Canadian children was equally important.

Aviator Performs Dangerous Stunt

Makes First "Outside" Loop Ever Attempted in Commercial Plane

Minneapolis, Minn.—Charles W. (Speedy) Holman, holder of the world's record of 1,433 consecutive loops, claims the distinction of having made the first "outside" loop ever negotiated in a commercial plane.

Holman performed the feat at an altitude of 4,000 feet over World Chamberlain Field here. He used the same Wright Whirlwind-motored biplane with which he won the New York-Seattle air derby two years ago.

The outside loop, regarded by aviators as one of the most dangerous "stunts" in flying, had never before been completely worked out strong, especially constructed wings.

Savings Deposits Less

Ottawa.—Savings deposits in Canadian banks decreased by more than \$7,000,000 during February, according to the monthly bank statement issued through the department of finance.

Railway locomotives now weigh as much as 250 tons.

W. N. U. 1924

Long Term Leases For Churchill Falls

Will Probably Be For 99 Years Says Hon. D. G. McKenzie

Winnipeg.—Leases of the lands in the townships of Churchill, terminating in 1925, of the Hudson Bay Railway, will probably be for 99 years, transferable and subject to revision as to rates at the end of five years, and each ten year period thereafter, it was stated by Hon. D. G. McKenzie, minister of mines and natural resources for Manitoba.

It was estimated a few days ago by Premier Bracken, that the government did not intend to sell the lands at Churchill. Interest in the settlement of Manitoba's northern sector continues to increase, Mr. McKenzie said. The government will concentrate its work on the townships of Cranberry Portage and Sherbrook-Gordon, the minister added.

Will Join Los Angeles To London Flight

Australian Aviators Plans To Accompany Lancaster

Hedonak, N.Y.—Mrs. Keith Miller, Australian aviator, who flew with Captain William Lancaster from London to Australia, has said she will accompany the Lancaster on its proposed flight from Los Angeles to New York, London and return.

Captain Lancaster will be pilot on the projected flight and Captain Harry Lyons will be navigator. Mrs. Miller said that she hopes to take off from Los Angeles and fly to New York to reach New York in one hop and fly between the east and west coast on the great lakes and the Atlantic. They will use a tri-motored all-metal plane.

Questions Gun Boat On Lakes

Ottawa.—Questions regarding the approach to the Canadian shore in one of the great lakes record of a U.S. gunboat have been placed on the order paper of the House of Commons by Gen. A. E. Ross, Conservative Member of Parliament. He requests information as to whether there is an agreement between the two countries for the use of gunboats on the great lakes and if Canada has any armed boats thereon.

Former Dorn Official Arrested

Berlin.—Police admitted that they had arrested Karl Hartung, secretary to the former Kaiser's office, Hermann Goering, who was held secret. It was reported Hartung had threatened to make "revelations" about conditions at Dorn Castle in Holland.

SUNDAY SCHOOL LESSON

APRIL 21

COMFORT FOR GOD'S PEOPLE

Golden Text: "As one whom his mother comforts, so I will comfort you."—Isaiah 66:13.

Lesson: Luke 11:31-33.

Explanations and Comments

The People of Judah were suffering their Full Penalty, verses 1, 2.—We pass today in thought from the lesson of the "Prophets" to the story of the "Prophets" under good King Hezekiah (our last lesson), to the time when Jerusalem had fallen prey to the Babylonian power and had been laid waste, and the majority of her people carried away into exile in Babylon. Comfort you, my comfort to my people, saith your God. How great was the people's need of comfort! It is shown in the story of the "Prophets" in Isaiah 40:1; 49:14. Who "the ye" are: "the prophets," or the prophetically-minded among the people; certainly not the priests; "the prophets" may be numbered, but the Dearly who speaks through them speaks as already known and acknowledged. "My people, saith your God." By these impersonal words is a personal revelation is made.

Speak ye comfortably to Jerusalem. Speak comfort to the heart of Jerusalem, is the message of the "Prophets" to the people. The prophets were to put hope into the heart of the people, strengthen them by an assurance of a speedy return to their home land, Jerusalem (then in ruins) as "an ideal representation of the people." The city had suffered in and was being rebuilt, and their deliverance was at hand. "I will tell her that her warfare is accomplished (her time of service), her exile, is ended; that her inquiry, her guilt, is pardoned; that she has received double the penalty (ample punishment) for her sins."

The prophet's task is laid upon all who would speak of Christ to men. Speak to the heart, not to the head or the conscience. God bestows in the person of his ambassadors, the "Prophets," the message which will find its way to the heart; for it is the assurance that will give service of the term of exile is past, that the sin which brought the exile is forgiven. How wonderful and gracious still, that God's mercy reaches that the one who follow our footsteps have more than expected it!—Alexander MacLaren.

Tornado In Arkansas

Death and Destruction Follow In Wake Of Storm

Little Rock, Ark.—A tornado from out of the south swept through North Central Arkansas leaving a death toll of at least 20 persons, with injuries to many more considerably. A large number are insured and property damage is heavy. The storm apparently wrought greatest havoc near Spouton, north of Newport, where sixteen bodies had been recovered. Alicia, a few miles north of Spouton, also was reported to have suffered in and was killed by telephone and telegraph lines were down, and the reports could not be verified.

At Spouton, the rapidly with which the death toll was increasing caused predictions that it would reach 50 or 60 when all counties in that section had been heard from.

New U.S. Ambassador To Great Britain

Appointment Of Former U.S. Vice-President Is Announced

Washington.—A formal announcement of the appointment of former Vice-President Dawes as ambassador to Great Britain has been made at the White House.

The appointment was made after receipt of word from the state department that the British government had advised that the appointment of Dawes would be entirely acceptable to the King.

NEW RECORD SET IN C. N. R. REPORT FOR 1923

Ottawa.—The railway operating revenue of the Canadian National for the year 1923 reached the record figure of \$27,663,152. After payment of operating expenses, amounting to \$18,145,343, the net operating income was approximately five million dollars. Other charges, the total operating income was \$18,213,729 compared with \$16,789,724 in 1922.

The report of Sir Henry Thornton, chairman and president, covering the operations of the system in 1923, was tabled in the House of Commons by Hon. Charles A. Dunning, minister of railways and canals. It tells of the progress made by the privately owned system in its various departments.

The ratio of operating expenses to gross earnings in 1923 was 75.85 per cent, as against 81.75 per cent in the previous year.

The gross earnings exceeded those of 1922 by \$27,915,556, (11.2 per cent). Freight traffic produced \$20,429,962; passenger traffic, \$34,187, 023; express, \$13,397,373; mail, \$3,092,212, while miscellaneous operations produced \$16,508,318. Passenger revenue increased 17 per cent over the figure for 1922. Freight and press revenues were increased by \$6,955,947 (55 per cent).

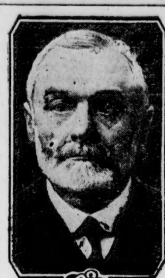

The total Dominion grain crop harvested in 1923 was approximately 1,200,000,000 bushels. The report estimates an increase of nearly 10 per cent over the figure for 1922. For the calendar year grain deliveries on the western region of the C.N.R. were nearly 37 per cent over the former record made in 1922.

YOUNG BRITISHES FOR CANADA

Thirty young men, recruited from the industrial areas of Great Britain for the farming lands of Canada, on their way to Norval, Ont., where they will receive special farm training before assuming that role as farmers. They were brought to Canada on the C.P.R. liner "Duchess of Richmond," under the auspices of the national headquarters of the Y.M.C.A. in England. The picture here shows a typical group on the train taking them to their new homes.

APPOINTED REAR-ADMIRAL

Admiral Sir Montague Browning, who has been appointed rear-admiral of the United Kingdom in succession to Sir Stanley Colville, Sir Montague Browning was with the grand fleet during most of the world war.

More Settlers Going Into Peace River

Figures To Date Show Large Increase Over Last Year

Edmonton.—Nearly 1,000 settlers with a total capital estimated at approximately \$1,150,000, have gone to the Peace River country as new settlers to date this year, according to colonization officers here.

The settlers are in the majority of cases Canadian and American of excellent type, probably 90 per cent of them are seeking homesteads, which means that the great bulk of the settlement will be on new land.

Lands beyond railway extension both north and south of the Peace River are favored, the homesteads being about equally divided between Fairview, on the north side of the river, and Hythe, on the Grand Prairie extension south of the river.

Money For Immigration

Over Million Dollars Spent In British Isles In 1923

Ottawa.—A total sum of \$1,016,292 was expended by the department of immigration in the British Isles in 1923. The sum expended by the same department on the continent of Europe alone last year, was \$7,796,67. The amount expended for obtaining immigrants in the United States was \$292,167. The aggregate amount spent by the immigration department from 1913 to 1923 was \$51,818,024.96.

The information was given in the House of Commons by Hon. Robert Burke, minister of immigration and colonization.

Income Tax Collections

Ottawa.—There was an increase of \$2,531,250 to the total income taxes collected in the year ending March 31 last, as compared with the year before, it was announced by Hon. W. D. Daler, minister of national revenue, in a statement issued. The total for the past year was \$59,422,207.

Starts Tenth Annual Tour To Western Provinces

Ottawa.—Round on a journey of eleven thousand miles, the tree-planting lecture car of the Canadian Forestry Association has left Ottawa and will spend the next six months in daily travels to Western communities. This is the tenth annual tour of the lecture car and to intensify the educational effect, talking pictures have been installed.

The lecture car is built with a sloping floor and with seats for 125 people.

Electrical generators, radio and other machinery are able to project talking pictures at hundreds of points on the western railways where movies are seldom seen. The instruction given in the car is extended to groups of school children who frequently require six meetings daily to accommodate them. Last year the Canadian Forestry Association visited 20 prairie communities, giving instruction in the building of shelter belts and the beautification of farm homes.

Leaves Estate To Medical Research

Army Doctor Renounces Man Met During War

Toronto.—A friendship established during the war between a medical sergeant and his superior officer, the "Man Alone" is recalled through the probate of the will of Dr. W. H. Scott, of Carleton Place, Alta.

The will provides that P. W. Houghton, D.C. M.M., and bar, Legion of Honor, and former medical sergeant of the First Battalion, re-enlisted in 1916 and a section of land at Carleton Place, Ont., be given to the medical research fund.

Houghton met Dr. Scott during the war, and the two became friends. He was hospitalized with wounds. He saw nothing more of the doctor until 1920, when they met in Galt, Ont.

RUST RESISTING WHEAT SOON TO BE AVAILABLE

Winnipeg.—Efforts of agricultural scientists to develop a rust-resistant wheat, which would save millions of dollars annually, are meeting with success.

At a meeting here of the Associate Committee on Rust Research, organized under the auspices of the Dominion Department of Agriculture and the National Research Council, reports were delivered showing that rust-resistant wheats which appear to have good baking and milling qualities have been secured through the plant breeding work engaged on the problem and now available.

Playing tribute to the work of Canadian scientists, especially those working on agricultural problems, Dr. J. H. Grisdale, deputy minister of agriculture of the Dominion, said that the study and successful application to the problems had not produced results which seemed a fair way to solve the difficulties in the way of combating the rust menace. This, he added, was obtained through the close co-operation of the plant pathologists and plant breeders.

During the sessions of the committee it was reported by L. H. Newman, Dominion cerealist, that baking tests on some 36 lines of Marquis Cross rust-resistant wheats are under way at Ottawa. Of these several showed real promise and some of them excel in baking qualities.

Members of the committee today witnessed a demonstration of a newly-developed rapid electronic method for the determination of moisture in wheat. The demonstration was conducted by Professor Burton, of the University of Toronto, and Arnold Pitt, inventor of the instrument. The instrument is not yet fully developed but gives great promise when complete details of its operation have been worked out.

Tests developed last summer in Manitoba showed that sulphur dusting of grain is effective in controlling the rust, but further research was necessary for the development of a dusting schedule. Small plot, field and greenhouse tests were conducted. In greenhouse and field tests, driven machines were used.

At the concluding session of the conference, Dr. Grisdale announced that a conference of plant pathologists conducting research in plant diseases other than rust would be held in Edmonton some time during the autumn.

TWO DEFENCES FOR SINKING OF THE "I'M ALONE"

Washington.—Two defences for sinking by coast guard vessels of the same name as the case of the "I'm Alone" in a lengthy note prepared by state department officials in answer to the protest of the Canadian Government.

The note supports the coast guard approval of Secretary of State Stimson. It is understood that Mr. Stimson has examined the draft, but whether he made any changes is not known. The note is expected to go forward soon.

The note supports the coast guard in sinking of the "I'm Alone" in the Gulf of Mexico, with an exhaustive review of previous run treaty ship seizures.

It contends in that place, it is understood, that three Canadian ships seized in recent years, the "Vince Gold," "The Albatross," and "The Albatross," were hailed within the treaty limit, fled and were captured on the high seas and were approved by United States courts.

The note argues that the principle involved in these seizures is the same as in the case of the "I'm Alone" and that Canada did not protest these incidents. The state department, it is understood interprets the failure to protest as a tacit admission that seizures on the high seas under such circumstances is a proper security.

The second defence involves interpretation of the run treaty between the United States and Canada. The treaty states that the three-mile international limit, but it expressly grants to the United States the right to stop, search, and if the search warrants, to board fishing boats within an hour's steaming distance of the American shore. The note and the state department implied the right to employ necessary force in compelling fishing vessels to submit to being stopped, searched and seized by granting the right to stop, search, and seize.

Must Comply With Law

Canadians Have To Pay Head Tax To Enter States

Washington.—The wage ruling of the Supreme Court fifth-riding in border-crossing privileges from foreign-born citizens of Canada is construed by immigration officials to require that a considerable effect on native-born Canadians.

R. C. White, first assistant secretary of labor, said that while the court's ruling confirmed the admitted right of native-born Canadians to enter the international border at will, it is so doing they would have to establish the status of immigrants under United States law.

One of the effects of that will be to require a Canadian to pay the \$5.00 head tax as an immigrant and the \$10.00 consular visa fee. Mr. White explained that the difficulties have been occasioned by the practice of Canadian residents along the border in obtaining employment in the United States and to return to their foreign homes to work and back daily. The native Canadian if he intends to continue such employment in the United States will have to pay the fees and undergo medical examination, but once that is done he will have a practically unlimited right to border-crossing.

Toronto Student Wins Prize

Awarded Thousand Dollar Fellowship For Research

Montreal.—Miss Kathleen Bell, of McMaster University, Toronto, won the \$1,000 prize offered by the Royal Society of Canada for the best paper written by a student of any Canadian university on any one of certain specified economic problems. Miss Bell's paper was on the "The Impact of the St. Lawrence Waterways Plan."

The prize is in the form of a \$1,000 fellowship to enable the winner to pursue her studies in any Canadian University she may select.

N. H. Packey, University of Saskatchewan, was sixth.

Thinks Pace Necessary

Starnburg, Germany.—Curt Van Bernstorff, chairman of the German delegation to the League of Nations disarmament preparatory committee, on the eve of his departure for Geneva, expressed the opinion that the out-of-air pace was necessary and should be followed by world disarmament and the adoption of a general treaty settling all disputes by legal means.

EDITORIAL

In just a little while some of you folks will be putting the ice-box in service. When you do, put a can or dish of charcoal in the ice-box and that charcoal will absorb all the odor of vegetables and thus keep the milk from tasting of onions, the butter from absorbing odors, etc. It's really a good stunt.

A reliable implement dealer is a valuable asset to the farm community. If this service is satisfactory he is entitled to a living wage—that's all we ask.

Len Krog, brother of Neil, says a barber is a brilliant conversationalist who occasionally shaves and cuts hair.

John Long just had his

tractor overhauled last week and his bill including labor was \$60. John says that his tractor has been out of this year for four sets of harness was \$70, which is a yearly item.

Can You Finish It? A father, to lenient by far.

Let his son drive around in his car. Now Mamma is sore. "Cause the son 'shines' no more."

The "Lads" know how to do things as the "Dads" will all agree. Their banquet and games were thoroughly enjoyed by all present.

Little Johnnie to teacher: "Can anybody be punished for something he didn't do?"

Teacher: "Why, certainly not, Johnnie."

Johnnie: "That's fine. I haven't done any 'yithin'."

Look what you get with a Mc-Dr. Little Genius Tractor Flow: 1. Heat-treated beams that cannot be bent or broken.

2. Simple, durable power lift that operates quickly and easily.

3. Zerk oiling system that saves time and bearings.

4. Spring-release hitch that saves broken plow shares.

5. All levers placed conveniently for the tractor operator.

When your engine knocks it may be firing too soon. When your engine knocks, he hasn't been fired soon enough.

"Good Equipment Makes a Good Farmer Better."

Local and General

Coming this week to the Champion Theatre, "The Foreign Legion."

Found—Firestone tire, size 440-21 and rim. Owner call at Chronicle office.

A red-blooded Drama of Love and Adventure; of strong men on the quest of Gold. The spirit of true Romance that tugs at Humanity's Heart. Made colorful with comedy—tears—thrills and THRILLS! That's "The Trail of '88."

K. H. McLean R.O. of Anderson & McLean, Special Spectacles, 208 8th Ave. West, Calgary, will make his monthly visit to Champion Thursday, April 25th. At the Drug Store.

E. Boyd and family, who have resided in Champion and vicinity for the past year left during the week for Oids, where Mr. Boyd has rented a farm.

A handsome Curtis air stand and an electric vulcanizing outfit are recent additions to the equipment of the Central Service Station.

Wanted—Four dozen Turkey Eggs for hatching. Leaves word at Chronicle office.

Don't forget "The Trail of '88" on Friday and Saturday, April 26-27. Regular prices.

The Ladies' Aid meets at the home of Mrs. Friesen on Thursday, April 25th, and a good attendance is requested.

Mrs. Adam Ferguson, Miss Marjorie Ferguson and Mrs. Roy Leith, of Champion, were Lethbridge visitors during the week and were registered at the Marquis hotel.

Mrs. J. Vanbiesen returned this week from a two month's visit in Montreal. She was accompanied on her return by H. Gosselin, who has taken a position on the mine staff.

Ted Ashmore left for the Peace River district, where he has a homestead near the B. C. boundary which he acquired last year. He purposes making considerable improvements there this year.

High winds made seeding operations uncomfortable, to say the least, at the first of the week but the last three days have been almost perfect and the progress made has been entirely satisfactory. As was to be expected horses are only a partial factor in this year's sowing in every direction. By the week end a large percentage of the wheat, estimated as high as 40 per cent by some, will be in the ground.

Born at Mrs. E. Speer's private hospital on April 13th to Mr. and Mrs. Wm. Isaacson of Champion, a son.

THE TRAIL OF '88
98
A Metro-Goldwyn-Mayer Picture

Friday & Saturday
April 26-27

L. W. Church was taken seriously ill last week and was taken to the Lethbridge hospital on Saturday. What was feared might be a much worse trouble developed into a bad case of tonsillitis. He is back on the job again looking a little worse for wear but otherwise as well as ever. Congratulations are in order on the promptness of his recovery.

U. S. Alexander has purchased the residence formerly occupied by J. T. Stephenson and will move into it shortly.

Walter Harris and Willie Anderson were business visitors to Calgary recently and it is rumored made extensive oil purchases. At any rate oil went up the day they arrived.

Work has been started on the new exchange building for the Alberta Government Telephones at Drumheller and tenders will be called for shortly on new buildings to be erected at Hanna, St. Paul and Grande Prairie. Continuous service was established during the past month at Chipman, Nobleford and Delburne exchanges. Service in Calgary reached a new mark during the past week with the installation of the twenty thousand telephone in the city.

Baby Chicks

Baby Chicks—Canada's Best-to-Lay 100 per cent Alive Leghorns \$17.00 per 100; Anconas, Barred Rocks \$18.00 per 100; Rhode Island Reds \$19.00 per 100; Wyandottes, White Rocks, Buff Orpingtons \$20.00 per 100. 12 month Poultry Course Free.
